

Basic Business Requirements:

- **Event Creation and Management:**

Allow organizers to create, edit, and manage events, specifying details such as venue, date, capacity, and agenda, much like designing the blueprint for a memorable gathering.

- **Attendee Registration and Ticketing:**

Enable attendees to register or purchase tickets for events, ensuring a smooth entry process similar to opening doors to a well-organized celebration.

- **Agenda and Speaker Coordination:**

Manage event schedules, speaker sessions, and presentation materials, arranging them like carefully placed pieces in a theatrical performance.

Advanced Business Requirements:

- **Automated Notifications and Reminders:**

Implement reminder systems for attendees and speakers about schedules and updates, acting like a guiding clock that keeps every participant on time.

- **Networking and Interaction Tools:**

Provide features such as attendee messaging, group discussions, and meeting scheduling, weaving connections between participants like threads in a social tapestry.

- **Event Analytics and Feedback:**

Collect feedback and analyze participation data to evaluate success and improve future events, much like studying a map to plan the next journey.
